

MOTOCRANE CLASSIC

CAMERA CAR SYSTEM

ARM

75 DEGREES TOTAL JIB MOTION
360 DEGREES ROTATIONAL MOTION

WEATHER

WATER RESISTANT
NOT SUBMERGABLE

FORCES

130 KM/H MAX SPEED
STRAIGHT OR 90 DEGREES

CAMERA POSITIONS

LENS HEIGHT 1M ABOVE, 1M BELOW ROOF LEVEL
LENS CAN ACHIEVE 2M RADIUS FROM CENTRE

The Motocrane Classic was the first car crane using universal suction mounts to quickly fit the rig to most vehicle roofs' or even the picture car itself for reverse angle shots.

Attaches to any non-fabric, non-glass roof between 2.5' and 4' in width.
Other mount solutions - Can-Am Maverick ATV and conventional tracking vehicles.

Using slip rings the Motocrane offers unlimited 360 degree rotation, and 70 degree vertical lift.

APPLICATIONS & VEHICLES

MOTOCRANE

The MOTOCRANE CLASSIC has been for some time superseded by the MOTOCRANE ULTRA, HYPER and RADICAL

Despite the improvements in the latest versions, the MOTOCRANE CLASSIC still has some niche applications, from both its compact size and accessories that allow it to mount directly onto the picture car.

The CLASSIC also has been successfully rigged to an all terrain vehicle like the CANAM Maverick Turbo RR and likewise can be rigged to any off road vehicle for use both moving or static shots with a suitable gimbal (Ronin 2/Movi XL/Movi Carbon).

TECH SPEC

Boom Length (From Centre)	6'8' - 1.8m/2.4m
Overall Length	9'11' - 2.7m/3.3m
Payload	25lbs - 11.3kg
Maximum Operating Speed	80mp/h - 128.7km/h
Maximum Acceleration	1g
Maximum Lens Height (From Roof)	3ft - 0.9m Above & Below
Maximum Swing Speed (360 Degrees)	4 Seconds
Power Input	48v Lion
Water & Dust Resistant	IP64
Certifications	CE, RoHS, UL
